# Greek Isle 4x8 17th Century (Thin Veneer 1" Thick)

Division 04 Masonry, Section 04 21 13 clay facing brick

## Physical Properties

Verify project-specific requirements before installation

## Cleaning

https://prosoco.com/ Clean with masonry-safe methods. Test all cleaning products on a small inconspicuous area first

## Installation (Standards / Codes)

Install in accordance with applicable masonry standards, local codes, and project specifications.

## Storage & Handling

Store dry, covered, and elevated from grade. Protect from jobsite contamination

## Mortar Recommendations

Use mortar type and joint profile specified by the design professional. Mockups are recommended

## Notes

1. **Identify the Correct Face Side: ** Ensure you distinguish between the face and the sawn back side of the brick. The correct face will feature a fired clay surface typically displaying variegated colors, some with texture or paint. 2. **Achieve a Uniform Blend: ** Always draw brick from multiple sleeves simultaneously to achieve a well-blended appearance. 3. **Clean the Bricks Thoroughly: ** Wash each brick on both sides before installation. Although the bricks undergo rinsing after cutting, some dust may remain. 4. **Plan Your Layout: ** Arrange the brick on the floor according to how you'd like the colors to blend on the wall. Instruct your installer to follow this pattern. 5. **Utilize Broken Brick: ** Use any broken brick from the shipment for end cuts. Since used bricks may arrive with a few broken pieces, we include extras to ensure you have sufficient material..
