División 04- masonry , section 04 21 13 - clay facing brick

There is a stark contrast between the smooth, chalky texture of the mortar and the rough, porous, and pitted surface of the exposed brick. The brick colors are highly varied, showing a mix of pale pinks, light tans, sandy yellows, and grayish browns. Disclaimer: Because these are reclaimed used bricks, variations and imperfections are to be expected and add to their...

Notes

1. **Identify the Correct Face Side: ** Ensure you distinguish between the face and the sawn back side of the brick. The correct face will feature a fired clay surface with remnants of used mortar, typically displaying variegated colors, some with texture or paint. 2. **Achieve a Uniform Blend: ** Always draw brick from multiple sleeves simultaneously to achieve a well-blended appearance. 3. **Clean the Bricks Thoroughly: ** Wash each brick on both sides before installation. Although the bricks undergo rinsing after cutting, some dust may remain. 4. **Plan Your Layout: ** Arrange the bricks on the floor according to how you'd like the colors to blend on the wall. Instruct your installer to follow this pattern. 5. **Utilize Broken Brick: ** Use any broken brick from the shipment for end cuts. Since used bricks may arrive with a few broken pieces, we include extras to.
